# ALARMED DIRECTIONAL SYSTEM - ADS

INCREASE THE SECURITY OF YOUR ENTRANCE AREAS

The Alarmed Directional System (ADS) is designed to enhance security for unmanned areas, specifically entrances or fire exits. The ADS is supplied as a standalone oval upright that can be integrate with automatic gates, uprights and railings.

FEATURES:

- Increases the level of security in entrance areas.
- Prevents customers from exiting the wrong way.
- Can be used as a stand-alone system or linked to entrance gates.
- Voice-box for individual welcome message.
- Audible alarm sound (if no voice message is used).
- Integrated customer counter function.

DISCLAIMER

Environmental conditions can affect the normal function of the sensor, i.e. reflecting surfaces. It is advised to install the ADS.

The ADS includes a directional sensor and can sound an alarm signal or play a recorded voice message with the voice box option.

In Secure configuration mode the gates receive a signal to close when the ADS is triggered, preventing customers from exiting the wrong way.

A customer counting option can be added by simply incorporating one of our external displays.

OPTIONS:

- Individual messages (to be provided in digital format by customer or recorded by a professional studio).
- Standard messages in different languages available.
- External display linked by wire.
- Left- or right-hand version.
- Chrome or powder-coating in various RAL-colors.
- Reference upright optional.
